

Training Day 16 Daily Dairy

july-1

- Topics Covered:
 - Introduction to Django REST Framework (DRF) for building RESTful APIs.
 - Explored DRF's serializer classes to convert model instances into JSON format and vice versa.
 - Worked with DRF's viewsets (**ModelViewSet**) to handle CRUD operations automatically.
 - Set up basic API endpoints for listing, creating, updating, and deleting records.
- Key Learnings:
 - Understood the core concepts of building APIs with DRF, including serializers and viewsets.
 - Successfully created basic RESTful API endpoints for a Django application.
