

Training Day 18 Daily Dairy

july-3

Topics Covered:

- Wrote unit tests for models, views, and forms using Django's **TestCase**.
- Simulated requests in tests to verify the correctness of views and forms.
- Practiced coverage testing to ensure all critical parts of the code were tested.
- Explored how to write tests that interact with the database, and how to mock data in tests for efficiency.

Key Learnings:

- Gained experience writing comprehensive tests to verify the functionality and reliability of Django apps.
- Understood the importance of testing in preventing bugs and ensuring the stability of the application.
