

# **Training Day 11 Daily Dairy**

## **june-24**

### **Topics Covered:**

- Learned the concept of **Class-Based Views (CBVs)** in Django.
- Worked with common CBVs like **ListView**, **DetailView**, **CreateView**, **UpdateView**, and **DeleteView**.
- Practiced customizing CBVs by overriding methods and using mixins.
- Explored the difference between function-based views (FBVs) and CBVs, and when to choose each.

### **Key Learnings:**

- Understood how CBVs help simplify repetitive tasks (CRUD operations).
- Gained experience in customizing CBVs to meet the specific needs of an application.
