

Training Day 14 Daily Dairy

june-27

- **Topics Covered:**

- Learned to manage **static files** (e.g., CSS, JavaScript) and **media files** (e.g., user uploads).
- Configured **STATICFILES_DIRS**, **STATIC_URL**, and **MEDIA_URL** for serving files in development and production environments.
- Discussed best practices for handling static and media files in production, including the use of **CDNs** (Content Delivery Networks).

- **Key Learnings:**

- Understood how to configure static file and media management for a Django project.
- Practiced handling file uploads and serving static content efficiently in production.
